PROFILE

I am passionate about technology and programming, I am fascinated by the creation of digital products.

Meeting with UX Design was a pleasant surprise, since in this framework I can investigate the needs and behavior of users and thus, design for them pleasant experiences within the web. All this I complement with my knowledge of Javascript, HTML and CSS, which allows me to have a comprehensive vision of the final creation of the product.

EDUCATION

CECAT Tulum Quintana Roo

LICENCIATURA EN GASTRONOMIA
2010 -2013
